link2pump

Control your fuel.
Know the numbers.
Save more.

Fuel is the lifeline of mining operations. Managing it efficiently ensures continuous operations, minimizes downtime, and controls costs.

Link2Pump automates fuel dispensing and tracking, providing real-time data, security, and seamless integration for enhanced efficiency in demanding environments.

Why Choose Link2Pump?

Eliminate Fuel Theft & Waste
Secure authorization and real-time monitoring prevent unauthorized fuel use.

Optimize Operations
Reduce idle time and keep equipment fueled efficiently.

Complete Visibility & Control
Track fuel consumption per vehicle and site to optimize budgeting.

Designed for Rugged Environments
Built to withstand the most challenging mining conditions.

Seamless Integration
Works with your existing systems, no need for additional software.

Life-Time warranty for all equipment!

How It Works:

- **Secure Fuel Dispensing**
  Identify and authorize users instantly.

- **Real-Time Monitoring**
  Track usage, costs, and performance from anywhere.

- **Automated Reports**
  Get accurate data without manual logs.
